

SUBCONTRACTING OF WHOLESALERS FOR FARMING PRODUCTS		Doc No. : CON-7.4.2
Rev. No. : 00	Rev. Date : 07/10/2015	Page 1 of 1

between (Certificate holder) In the following called the certificate holder	and (Subcontracted wholesaler) In the following called the subcontractor			
1. The certificate holder contracts the subcontractor for purchase and storage of the following products:				
	Farmer	Crop	Area	Annual production capacity
2. The certificate holder applies to ADITI for certification according to the following standards:				
3. The subcontractor does not need an own certificate.				
4. The subcontractor agrees on fulfilment of the organic standards, especially avoiding commingling of organic and conventional products. The subcontractor will not handle the same product in conventional and organic quality, unless authorized by ADITI.				
5. The subcontractor will keep an updated list of certified producers and agrees to purchase only from the producers mentioned on this list. He/she will keep an overview of the current production capacity of each farmer, and inform the certificate holder in case of excessive delivery by a farmer. The certificate holder agrees to keep the approved farmers list updated.				
6. The subcontractor will keep records on purchased, stored, and delivered quantities, and file all invoices, waybills and other relevant documents.				
7. The subcontractor will label all products, including information on product, quantity, provider, batch number, date of purchase, organic condition, and name of certifier.				
8. The subcontractor will give ADITI and the certificate holder free access to his/her operation, including storage rooms and documents, for announced and unannounced inspections.				
9. The certificate holder will supervise permanently fulfilment of the standards by the subcontractor.				
10. The certificate holder is responsible for providing training and consultancy to the subcontractor.
